

Benefits

- ✓ Streamlined deployment of applications
- ✓ Interoperability across platforms and languages
- ✓ Faster time to market
- ✓ Enhanced Security
- ✓ Reduced operating costs while improving operational efficiency
- ✓ Access to a diverse set of Microsoft Certified Professionals
- ✓ Reuse through implementation inheritance, components, and web services

About LanceSoft

LanceSoft is leading global IT Consulting and Services provider. Headquartered in Virginia. LanceSoft provides advanced information technology solutions and consulting services to a host of corporate clients in the BFSI, LifeSciences, Healthcare, Telecom, Manufacturing, Technology, Retail, and various federal, state and local government agencies, across crucial markets

LanceSoft's Microsoft Services

LanceSoft has extensive experience in various Microsoft technologies. LanceSoft has invested in training resources and developing best practices for application development using Microsoft's .NET architecture, which enable LanceSoft to execute rapid, error-free application development to solve specific business needs.

✓ Custom Application Development

LanceSoft expertise in multitude of vertical and technical domains has positioned it strongly to deliver scalable, robust, secure and easily maintainable applications deploying any of the .Net languages. The application can be web-based, client-server based or mobile devices.

✓ .Net Application Development

LanceSoft is capable of building .NET solutions that are reliable, scalable and secure.

✓ Web Services development and System Integration

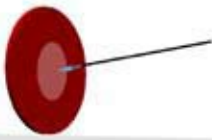

These services enable development of web services using .Net framework as well as the SOAP toolkit. Solutions that address the issues of interoperability of web services, transaction handling and security of web services are successfully deployed. System Integration using web services and wrapping of existing application with web services are also an integral part of the offerings.

✓ Re-engineering

LanceSoft offers services for re-engineering applications to .Net from legacy system.

✓ Migration Services

LanceSoft migration services include migration of various technology, web and desktop application to .Net and other Microsoft products like MS Exchange server, MSMQ etc.

Balance Shore Delivery Model

LanceSoft provides a unique well-defined model to facilitate low-risk and high-return outsourcing option called Balance Delivery Model or more popularly known as BDM. LanceSoft's Balance Delivery Model (BDM) is a systematic and holistic approach for a distributed project management and development methodology. Using BDM, LanceSoft is building systems while you sleep, getting closer to the 'Follow the Sun' model. BDM enables to use the right resources wherever they are located and divide the project into components that may be built independently and concurrently at various locations. The end result is faster delivery of solutions that meet user's business needs.

LanceSoft's Microsoft Technology skill set includes:

Programming Language

Visual Basic, Visual C++ (ATL), C, C#, VBA, .Net suites, Microsoft foundation classes (MFC)

Web Technologies

HTML/DHTML, ASP, ASP.Net, VB Script, Java script, IIS

Database

SQL Server 7.0/2000 and MS Access, OLAP, MS Replication

Middle Tier

COM+, Microsoft Commerce Server

Messaging

MS Messaging Queue (MSMQ 3.0)

Middleware
